

SNG BUILDER SERIES — GUIDE #005 · PREMIUM EDITION

A+ CONCEPT TRIKE FULL BUILD MANUAL

CUSTOM ELECTRIC TADPOLE TRIKE — COMPLETE MANUFACTURING PACKAGE

\$11K- \$14K BUILD COST	\$32,000 SOLD FOR	72V ARCHITECTURE	QS138 MOTOR PLATFORM	Fox EVOL SUSPENSION
---------------------------------------	-----------------------------	----------------------------	-----------------------------------	-----------------------------------

The A+ Concept Trike was built once, sold to a shop, finished on a Thursday, and was on someone's trailer by Monday morning — at **\$32,000**. The shop built it for \$11K-\$14K in parts. These are the complete manufacturing plans, dimensioned shop prints, and full bill of materials. This is the guide they used.

WHAT'S INSIDE THIS PACKAGE

● Master Build Pack

Complete engineering package — frame design, component layout, system integration

● Full BOM — Sourced & Priced

Every component from DOM tubing to Warp 9 wheels — sourced, priced, specified

● Drivetrain Configuration

QS138 motor, Votol/ASI controller, jackshaft setup, 72V battery integration

● Body & Finishing

Raptor plastics mod, KG scoop, Husky shrouds, KTM Duke 1290 tail, custom seat spec

● Dimensioned Manufacturing Drawings

Shop-ready prints with all critical dimensions — hand to a fabricator and build

● Frame Fabrication Plan

DOM tubing chassis — custom tadpole geometry, motor/battery mounts, gusset placement

● Steering & Suspension

Fox Float 3 EVOL RC2 (x4), custom column, Heim joint tie rods, spindle mounting

● Electrical System

72V harness, DC-DC converter, QS8/XT90 connectors, lights/signals, safety cutoffs

BUILDER'S NOTE — BRYAN JAWORSKI, SNG CYCLES

This was designed when nothing like it existed as a kit. The geometry, the body fitment combinations, the drivetrain packaging — all of it had to be figured out from scratch and documented so a shop could build it without me standing there. They did. It worked. It sold in four days. This is the complete package they used.

CUSTOM TUBE
FRAME

PLATFORM	
Configuration	Tadpole — 2 wheels front / 1 rear. Custom tubular frame.
Frame Material	DOM Tubing — main chassis with welded mount plates and gussets
Seating	Driver + passenger. Custom step-up seat with backrest. Diamond-stitched.
DRIVETRAIN	
Motor	QS138 Mid-Drive (or similar) — \$600-\$1,200
Controller	Votol or ASI — matched to motor. \$300-\$700.
Battery	72V / 40-60Ah Lithium Pack — \$800-\$2,000
Drive Chain	520/428 heavy-duty chain with tensioner — jackshaft system included
Jackshaft	Custom machined steel shaft + pillow block bearings x2 + mount plate
SUSPENSION	
Shocks	Fox Float 3 EVOL RC2 × 4 — Front + rear setup. \$2,800-\$3,400.
Shock Guards	Neon yellow — visual signature of the build
STEERING	
Column	Custom steering shaft — dimensions in dimensioned drawing package
Tie Rods	Left/right adjustable — Heim joint rod ends (high strength)
Spindles/Knuckles	Custom — front hub mounting. Spec in manufacturing package.
BRAKES	
Front	Hydraulic calipers × 2 with rotors — dual-front braking
Rear	Single hydraulic caliper + rotor
Master Cylinder	Handlebar-mount. Brake lines: custom length.
WHEELS & BODY	
Wheels	Warp 9 Custom — Yellow/Purple. \$2,200.
Front Body	Raptor Front Plastics (modified) + KG Scoop front intake
Mid Body	Kart-style side panels + Husqvarna shrouds (upper flow panels)
Rear Section	KTM Duke 1290 Tail — \$220
Floor	Diamond plate — black finish
ELECTRICAL	
Voltage Architecture	72V main system with DC-DC converter (72V → 12V) for accessories
Connectors	QS8/XT90 high-current connectors throughout
Controls	Hall throttle + switch cluster (lights/signals) + brake lever with safety cutoff sensor
Wiring	Custom harness — full schematic in master build pack
BUILD GRADE	
Skill Required	Advanced. Welding required for frame fabrication. Electrical and mechanical systems experience required.
Estimated Build Cost	\$11,000 - \$14,000 in parts
Retail Value	\$32,000 — verified sale price

A+ CONCEPT TRIKE — COMPLETE BILL OF MATERIALS

COMPONENT	NOTES	EST. COST
DRIVETRAIN		
Motor — QS138 or similar	Mid-drive electric motor	\$600-\$1,200
Controller — Votol/ASI	Matched to motor	\$300-\$700
Battery — 72V	40-60Ah lithium pack	\$800-\$2,000
Front Sprocket	Motor output sprocket	\$20-\$50
Rear Sprocket	Wheel sprocket	\$40-\$100
Chain — 520/428	Heavy-duty chain	\$50-\$150
Chain Tensioner	Spring or fixed	\$30-\$80
Jackshaft (custom)	Steel shaft, machined — spec in manufacturing package	\$80-\$200
Jackshaft Bearings	Pillow block bearings × 2	\$40-\$120
Jackshaft Mount Plate	Welded bracket	\$50-\$150
Secondary Sprockets	Gear ratio tuning	\$40-\$120
SUSPENSION		
Fox Float 3 EVOL RC2 × 4	Front + rear setup — premium suspension	\$2,800-\$3,400
Shock Guards	Neon yellow — visual signature	\$60-\$120
WHEELS		
Warp 9 Custom Wheels	Yellow/purple — set	\$2,200
STEERING		
Steering Column	Custom shaft — dims in package	\$80-\$200
Tie Rods	Left/right adjustable	\$80-\$200
Rod Ends — Heim Joints	High strength	\$60-\$150
Spindles / Knuckles	Front hubs mounting	\$150-\$400
BRAKES		
Front Calipers × 2	Hydraulic	\$150-\$400
Rear Caliper	Single	\$80-\$200
Rotors × 3	Front + rear	\$100-\$300
Master Cylinder	Handlebar mount	\$80-\$200
Brake Lines	Custom length	\$50-\$150
FRAME		
DOM Tubing	Main chassis — quantity and spec in manufacturing drawings	\$200-\$600
Mount Plates	Motor/battery mounts	\$100-\$300
Gussets	Reinforcement — placement in drawings	\$50-\$150
ELECTRICAL		
Main Cables	Battery cables	\$50-\$150
Connectors — QS8/XT90	High-current throughout	\$30-\$80
Fuse + Holder	Main fuse	\$20-\$60
DC-DC Converter	72V → 12V for accessories	\$40-\$120
Wiring Harness	Custom — full schematic in master build pack	\$100-\$300
CONTROLS		
Throttle — Hall sensor	Twist throttle	\$30-\$100
Switch Cluster	Lights/signals	\$30-\$100
Brake Lever w/ Sensor	Safety cutoff	\$40-\$120
BODY		
Raptor Front Plastics	Modified — trim spec in package	\$150-\$300
KG Scoop	Front intake	\$140
Side Panels	Kart style	\$50-\$150
Husky Shrouds	Upper flow panels	\$80-\$150
KTM Duke 1290 Tail	Rear section	\$220
Custom Seat	Step-up + backrest — diamond stitch	\$300-\$700
Diamond Plate Floor	Black finish	\$100-\$250
MISC / FINISHING		
Hardware Kit	Bolts, spacers, fasteners	\$150-\$400
Wrap / Finish	Purple accents — color scheme in package	\$100-\$300

ESTIMATED TOTAL BUILD COST

NOTE ON FOX FLOAT 3 EVOL RC2

The Fox Float 3 EVOL RC2 shocks (\$2,800-\$3,400 for the set of 4) are the single biggest line item in the build — and they're what make the ride quality what it is. You can substitute with a more budget-friendly shock and bring the overall build cost down significantly. The manufacturing package and dimensions are spec-agnostic for the shock mount points.

WHAT'S IN THE PACKAGE

GUIDE #005 INCLUDES

- APlus_MASTER_BUILD_PACK** — Complete engineering and build documentation
- APlus_Trike_Manufacturing_Package_Dimensioned** — Shop-ready dimensioned drawings
- A+ Shop Prints** — Fabricator-ready shop prints
- Full BOM** — Sourced and priced bill of materials (this document)
- Color / Finish Reference** — Build color scheme documentation

IMPORTANT — SKILL LEVEL

This is an advanced build. Frame fabrication from DOM tubing requires MIG or TIG welding capability. If you don't weld yourself, you can take the dimensioned drawings to any fabrication shop and have the frame made. The full package is designed to hand off to a professional fabricator — exactly how the original was built. You direct the build; the shop executes from the drawings.
